OBJECTIVE

Driven B.Sc. Computer Science undergraduate and certified Full-Stack Developer with hands-on experience building scalable web and mobile applications using React/Next.js, Node.js, Java, and SQL. Proven track record in API integration, system design, and UI/UX prototyping. Eager to leverage technical expertise and problem-solving skills in building high-impact software solutions within dynamic engineering environments.

SKILLS

- Frontend and Backend Development
- UI/UX Design
- Graphic Design
- Data Analytics & Data Science
- Node.js, React, Next.js, Python
- AI & Cybersecurity Essentials
- Typescript & JavaScript
- Java & C/C++
- Relational & Non-relational Databases
- Figma, Canva, CapCut, Adobe Express
- Git, GitHub, Docker, Linear, Trello
- Digital Marketing

EXPERIENCE

DirectEd Development Foundation **Jan 2024 - Jan 2025**

Junior Full Stack Developer (Apprenticeship)

- Developed responsive web applications using React.js and Node.js
- Collaborated with design teams to implement user-friendly interfaces
- Optimized application performance and implemented best practices
- Participated in code reviews and agile development processes
- Built RESTful APIs and integrated third-party services

Dedan Kimathi University of Technology **Feb 2026 - April 2026**

Computer Science Intern (Internal Attachment)

- Conducted system requirements analysis and process flow evaluation on existing manual voting procedures.
- Architected relational database schemas and backend logic for the web-based DeKUT Online Voting System.
- Designed and configured campus network topologies to support secure, real-time vote processing.
- Documented system specifications, ER diagrams, and network infrastructure reports for internal audit.

EDUCATION

Dedan Kimathi University of Technology **2024 – 2028**

Bachelor of Science in Computer Science

-

Kagumo High School **2020 - 2023**

Kenya Certificate of Secondary Education (KCSE)

A-

PROJECTS

Event Simplified: A comprehensive event management SaaS.

Tech Stack: [Next.js, NestJS, Supabase, SQL]

- Developed a dynamic dashboard for event coordinators to track tasks, manage logistics, and oversee project timelines.
- Implemented complex routing to handle specific event IDs and task filtering.
- Ensured responsive design for seamless usage across desktop and mobile devices during on-site events.

Learning Management System (LMS) An educational platform designed for an institution learning management.

Tech Stack: [TypeScript, Vercel, Tailwind CSS]

- Engineered a scalable e-learning platform facilitating admin, teacher and student access.
- Optimized frontend performance to ensure fast load times for educational content.
- Created a clean, intuitive user interface to enhance the learning experience for students.

DeKUT Online Voting System

Tech Stack: [TypeScript, MySQL, Node.js, Express, Figma, Cisco Packet Tracer]

- Conducted system requirements analysis to identify vulnerabilities in legacy manual election workflows.
- Designed high-fidelity wireframes and interactive UI/UX prototypes in Figma for voter registration and tallying interfaces.
- Architected a relational MySQL database schema and RESTful APIs using TypeScript to ensure secure, real-time vote recording.
- Configured network topologies to support reliable, tamper-proof vote transmission across campus infrastructure.
